

LandGuard

LandGuard operates seamlessly with a comprehensive sensor array that enables precise navigation and optimal performance. Its robust all-terrain drive system allows it to traverse rugged and uneven landscapes with ease, showcasing exceptional adaptability and resilience. A weather-resistant shell ensures uninterrupted operation in challenging conditions—from rain and wind to extreme heat. With a full 360-degree field of view, the system captures extensive environmental data to power real-time surveillance and advanced analytics. Integrated sirens and strobe lights enhance visibility and create a strong, commanding presence on-site.

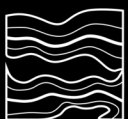

Functions/Features

- Autonomous Navigation System
- Battery Life (6 –8 hours*)
- Safety Sensors for Obstacle Avoidance (Static and Dynamic)
- Self-Recharging Capabilities
- 360-degree Video Streaming

SMART+

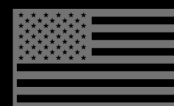

- Live Observability Tools
 - Camera Feeds
 - Lidar Feeds
 - Health Data/ Metrics
- Over-The-Air Intervention Capabilities
 - Remote Cockpit
- Task Management
 - Scheduled and Ad-hoc Patrol Execution
- Real-Time System Alerts
- State-of-the-Art User Interface
- Advanced video analytics detecting unattended objects, overflowing bins and faulty lights

How does it work?

Your **LandGuard** automated robot is built for visibility and presence—delivering nonstop patrols, deterring threats before they escalate, and maintaining control across your site.

1

Docked & Ready

Securely docked at its charging station—fully powered and on standby for its next patrol or rapid deployment.

2

Triggered to Deploy

Triggered by schedule, alarm, or real-time alert, LandGuard autonomously begins its patrol within seconds—no operator needed.

3

Autonomous Patrol

Equipped with advanced navigation and obstacle avoidance, it follows optimized routes or adapts in real time to detected activity.

4

Mission Complete

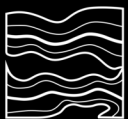

Automatically returns to its dock, uploads patrol data, and prepares for the next task.

5

Recharge & Repeat

Recharges efficiently and remains on standby—ready to roll again with zero downtime.

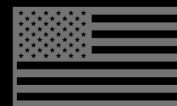

*You are trespassing on private property.
Please leave the area immediately.
Security has been notified.*

LandGuard

Use-cases & VA Detections

Autonomous Patrol & Security Detection

- Face recognition for blacklist detection
- Fence breach detection
- Crowd detection & people counting
- Illegal parking, smoking & littering alerts
- Loud sound detection (e.g. gunshot, glass break)
- Missing person & loitering detection
- Prohibited area & vandalism alerts
- Stolen vehicle & unattended object detection
- Overstaying vehicle deterrence
- Authorized vs. unauthorized personnel ID
- Automated public announcements & text-to-speech deterrence

Facility Monitoring & Smart Management

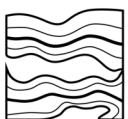

- Faulty escalator, lighting, and open door detection
- Overflowing bin alerts
- Meeting room & vendor management
- Wi-Fi scanning with automated reports

Concierge

- Directory Kiosk
- Events, Advertisements and Promotional Displays
- Follow-me Mode
- Text-to-Speech Announcements
- Two-way Communication
- Visitor Management

Fire & Safety

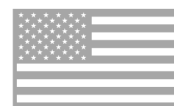

- Detection of Fire/Smoke
- Detection of Individuals Wearing Incomplete PPE
- Detection of Obstructed Fire Escape Route
- Public Announcement for Safety Protocols

We make the adoption of robotics **simple**

Virtual Guard

VirtualGuard is an all-inclusive solution that combines human expertise with integrated hardware and software to deliver a fully automated, end-to-end platform. Its true value lies in the synergy of these components, giving customers a streamlined and efficient system backed by continuous support.

Eliminating all the hurdles to adoption. **Let's Fly.**
